Carbon Offset Confirmation

This document confirms that

AIRPILOT ESCUELA DE VUELO, SLU (FLYSCHOOL AIR ACADEMY)

Has purchased carbon offsets for 583.87 tonnes of carbon emissions on April 2, 2023.

This document confirms that the bp Target Neutral service will purchase and retire verified carbon offsets for the quantified carbon emissions associated with the data provided by the user.

Carbon emissions quantification has been undertaken in accordance with the WRI/WBCSD Green House Protocol Corporate Standard utilising the 2021 UK Government GHG Conversion Factors for Company Reporting and are based on activity data provided solely by the user.

'Carbon' is used as shorthand to refer to CO_2e (carbon dioxide equivalent). CO_2e means the number of metric tons of CO_2 emissions with the same global warming potential as one metric ton of another greenhouse gas. The CO_2e emissions from the use of vehicle fuels are calculated on a WTW basis, covering the estimated lifecycle emissions of the product, including the production, refining, distribution, and combustion of the fuels. The methodology for calculating emissions has been developed with third party carbon experts ERM and is available at bptargetneutral.com.

Through the purchase of offsets, the bp Target Neutral service supports projects around the world that reduce or avoid carbon emissions. All carbon offsets retired are compliant with the International Carbon Reduction and Offset Alliance (ICROA) Code of Best Practice. Please note that the ownership of the carbon offsets retired does not transfer to you. For further information on bp Target Neutral offsetting services please see bptargetneutral.com.

The bp Target Neutral offsetting service is a voluntary program and is part of the bp group of companies. The company responsible for the program is bp International Limited, registered at Chertsey Road, Sunbury on Thames, Middlesex, TW16 7BP.
