

The aim of the **Multi Crew Cooperation (MCC) training is to improve** the cockpit coordination between the crew members. The MCC training course **is the bridge between the ATPL course and the future workplace within the cockpit environment.**

Our experienced **MCC trainers will equip you with knowledge that you will need to be able to work as a responsible pilot within an airline crew.**

The focus of the MCC course is the training of skills such as communication, decision making, teamwork and leadership.

Requirements

- Be in possession of the Private Pilot License (PPL) or Commercial Pilot (CPL) with Instrument Flight Rating (IR).
- Start: immediate, if you do not have a partner to carry out the flights, we will look for it.
